

Autonomy Education

EAS Systems Engineer Certification

Autonomy Education is an essential training program that enables you to get the most out of Autonomy's infrastructure software. Whether you are a developer/engineer rolling out the EAS architecture or a project manager wanting to stay abreast of the latest powerful features Autonomy Zantaz has to offer, Autonomy's training course ensures that you can maximize EAS's full potential and apply best practice methods that lead to successful deployments.

Combining both theory with practical lessons, the Autonomy Zantaz training program makes sure the user fully understands the capabilities and features of the software before installing, configuring and running the technology in the workshop.

Autonomy Training courses are heavily oriented toward hands-on practical experience to reinforce formal classroom instruction. Using fast-track training methods, the majority of the training will take place in a workshop environment following preset training courses that will challenge the trainee and aid them during the learning process.

Course Name:	EAS Systems Engineer Certification
Duration:	4 days
Audience:	This course is an introduction to EAS for System Engineers, System Administrators and EAS Users.
Format:	Practical Hand-on course 60%, Theory 40% in a dedicated training classroom.
Exercises:	Please note that all hands on exercises will be based on a Exchange 2007, Windows 2003 and SQL 2000 environment. Theory will cover all environments.
Course Outline:	<p>Enterprise Archive Solution (EAS) from Autonomy ZANTAZ is a highly scalable software application that manages the archiving, search, retrieval, long-term retention of email and associated attachments on messaging and file systems.</p> <p>EAS is an intelligent storage management software developed to provide organizations with a better way to manage information.</p> <p>This course is an introduction to EAS. Attendees learn about the benefits of EAS and how to install, administer and support an EAS environment.</p>

- What you will learn:** Upon completion of this course, students will be able to:
- configure and administer an EAS Archive Solution
 - implement Archive policies
 - archive mail messages
 - archive File Share documents
 - restore mail messages
 - restore File Share documents
 - search and retrieve archived mail messages
 - retrieve File Share documents
 - Archive PST files
 - manage archived mail messages and File Share documents using EAS Storage Manager
 - leverage EAS Advanced-Clustering functionality
 - recover from disaster
 - install and configure EAS Server & Client
 - install and configure EAS IIS & EAS Search
 - install and configure IDOL, DIH, DAH etc...
 - install and configure EAS Discovery
 - install and configure EAS OWA

- Prerequisites:** To ensure students get the most value from this course, those attending should meet the following prerequisites:
- Working knowledge of Microsoft Windows 2003
 - Working knowledge of Microsoft Exchange 2007
 - Working knowledge of Microsoft Outlook
 - Working knowledge of Microsoft SQL Server

- Agenda:** EAS Provides:
- 4 days of hands-on training
 - Fully Documented Training Materials which set out the tasks and lessons planned for each day.
 - Training Manual includes step by step solutions to each of the assigned exercises
 - Each trainee participating in the practical workshop will be provided with a dedicated computer
 - 60 minute written exam. Attendees must obtain a passing grade of 70%.
 - Lunch & Refreshments Included (Scheduled Classroom Training Only).

- Curriculum:**
- Section 1 – EAS Environment

- Section 2 – Working with EAS Clients
- Section 3 – Working with EAS Server and EAS Administrator
- Section 4 – EAS Search
- Section 5 – Exporting emails using EAS Discovery
- Section 6 – Managing Document Stores with EAS Storage Manager
- Section 7 – Installation and configuration of EAS and EAS Storage Manager
- Section 8 – Installation and configuration of EAS IIS and EAS Search
- Section 9 – EAS Client Setup Package
- Section 10 – Installation and configuration of EAS Discovery
- Section 11 – Installation and configuration of EAS OWA
- Section 12 – Course Summary
- Section 13 – Course Evaluation
- Section 14 – Certification Exam

Training Centers:

- San Francisco, CA.
- Dallas, TX
- Washington, VA.
- Cambridge, UK.
- Onsite on request

Capacity:

Autonomy Zantaz maintains small class sizes (10–12) in order to provide adequate individual attention.

Delegate Fees:

USA: \$2,950.00 USD + Tax

Europe: €1,800.00 EURO + VAT

UK: £1,750.00 GBP + VAT
