Management
Workshop

Workshop Overview

This workshop is designed for experienced Connected® data center systems managers and project managers as an advanced session focused on maintaining and growing a large, mature Connected solution. It is a 2½-day series of intensive interactions between customers, partners and Autonomy employees. The workshop is structured as a series of modules treating advanced topics in depth. It is presented and attended by various specialists from Autonomy's professional services, training, customer support, engineering, and operations organizations.

This workshop is designed exclusively for experienced site administrators managing large deployments, and treats topics at an advanced level that assumes in-depth product knowledge and experience with Connected technologies. If interested in attending, please contact your reseller or sales representative.
