

Connected Backup for PC Licensed Software Administrator Course

Autonomy ®

Course Overview

This course is designed for administrators and server managers within organizations backing up PC and/or server data to their own data centers. It provides a comprehensive understanding of the Connected® licensed software, enabling administrators to successfully manage its deployment and operations within their internal data centers.

Attendees will use and monitor a fully functioning on-site Connected data center. This true-to-life configuration ensures that topics learned in class are directly applicable to a production facility. Hands-on time helps build appropriate understanding and skill sets. Participants are encouraged to ask questions at all times during the training, leading to detailed discussions that benefit the entire group.

Duration

- *This course is offered through open enrollment to a scheduled event, or as a 2½-day on-site event*

Pre-Requisites

- *General familiarity with Microsoft Windows and Windows applications*
