

LiveVault
Administrator
Course

Course Overview

This course is designed for administrators who will be implementing and managing the LiveVault® service. It provides a comprehensive understanding of the LiveVault software, enabling administrators to successfully manage its deployment and operation within their internal data centers.

Attendees will use and monitor a fully functioning LiveVault installation. This true-to-life configuration ensures that topics learned in class are directly applicable to a production facility. Hands-on time helps build appropriate understanding and skill sets. Participants are encouraged to ask questions at all times during the training, leading to detailed discussions that benefit the entire group.

Duration

- *2 ½ days*

Pre-Requisites

- *General familiarity with Microsoft Windows Server and Windows applications*

Course Content

Attendees will gain an understanding of Live Vault and will cover the following topics:
